

Itali kuppiya Web Academy

A Comprehensive E-Learning Platform for Italian in Sinhala

Propose by **Kavini Pathagamage** · Software Engineer & Founder

Made with GAMMA

The Limitations of Social Media Learning

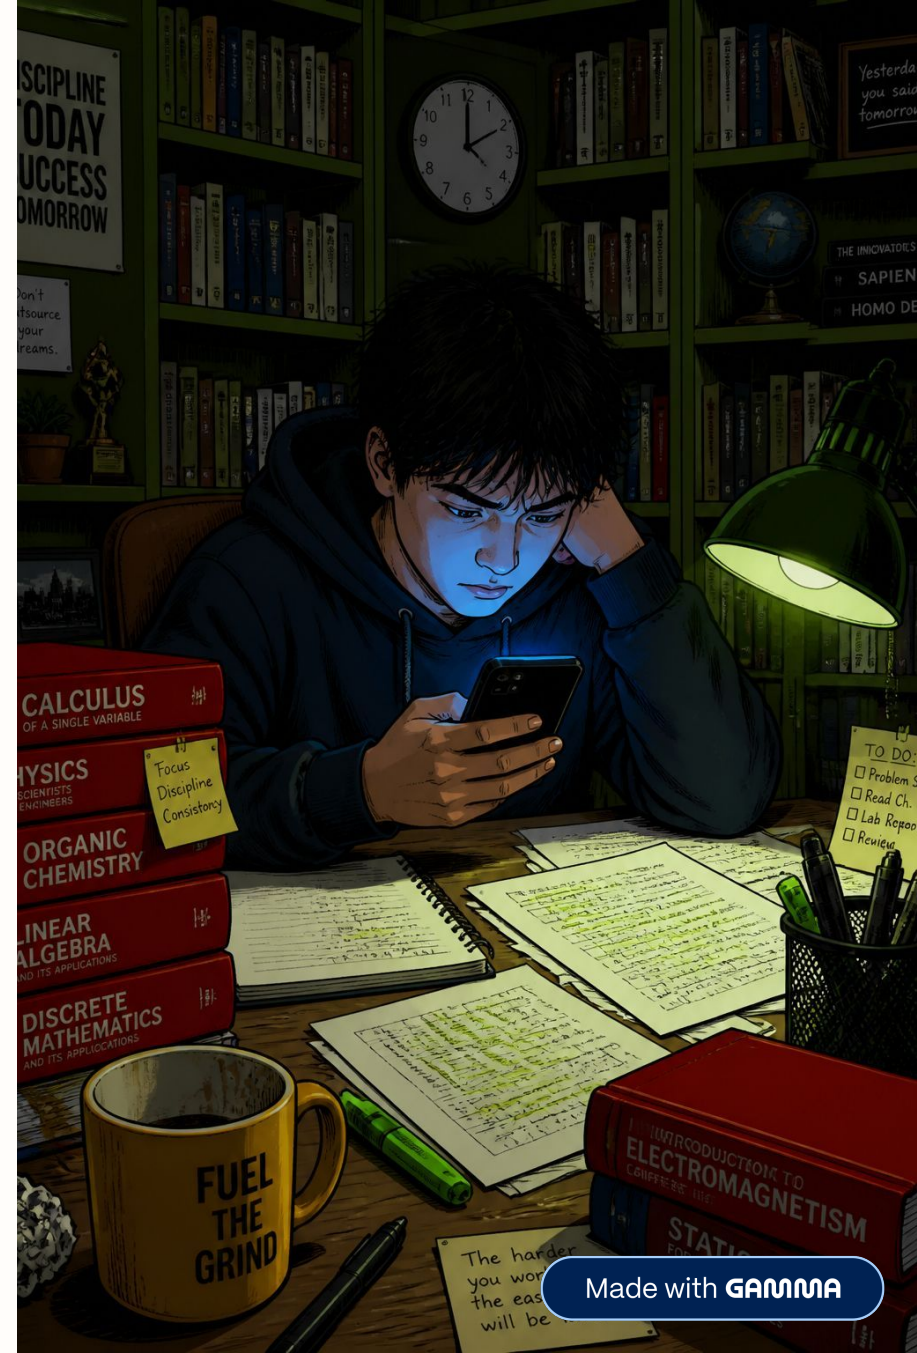

Today, Sinhala-to-Italian learning content is scattered across Facebook groups and pages — creating a fragmented, frustrating experience for serious learners.

✗ The Problem

Social media creates a highly distracted environment. Content is disorganized, progress tracking is impossible, and users are constantly interrupted by algorithms and ads.

✓ The Solution

A dedicated, distraction-free web platform where users can focus entirely on structured, high-quality educational content — built for learning, not scrolling.

Structured & Distraction-Free Education

ITSI Web Academy replaces the chaos of social media with a purpose-built learning environment — organized, focused, and entirely in Sinhala.

Logical Organization

Content categorized by topics, vocabulary modules, and grammar lessons — all explained entirely in Sinhala.

Level Assessment Quizzes

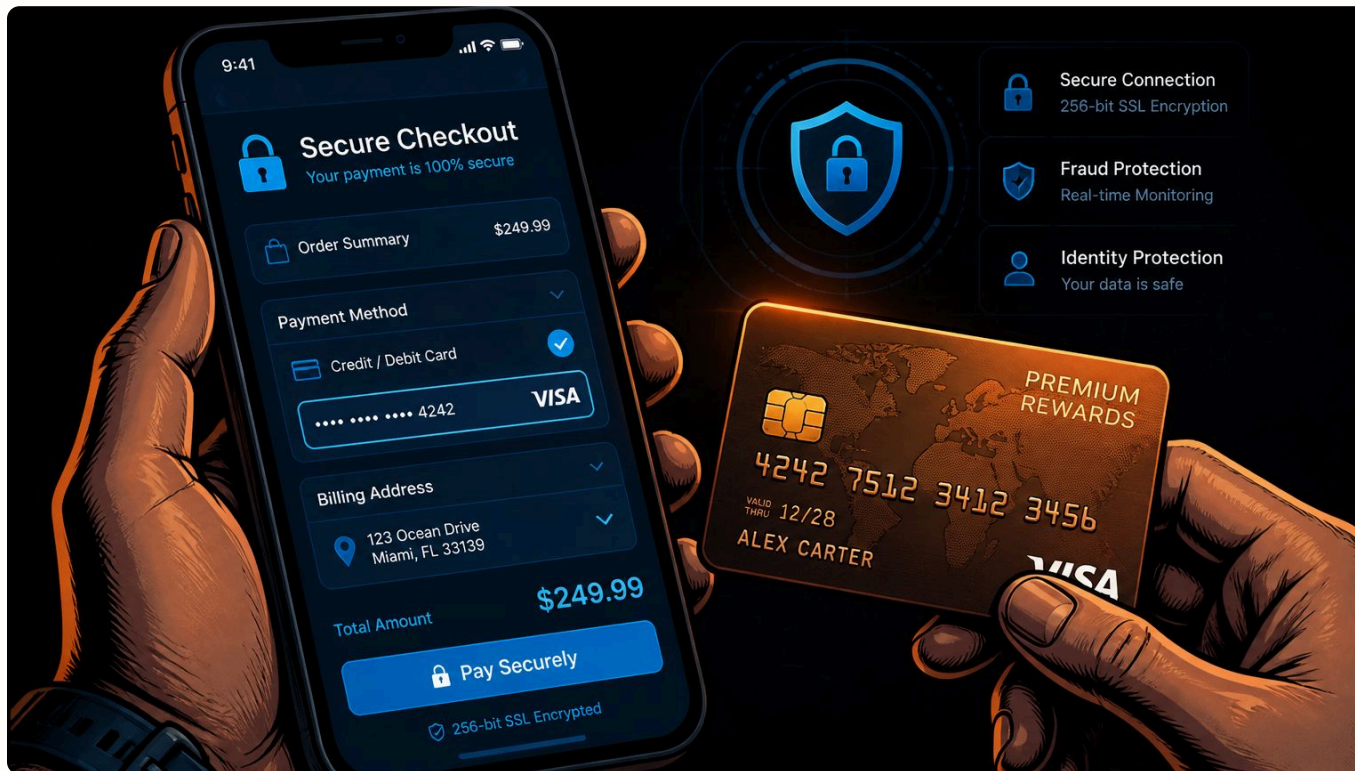

Dynamic quizzes test current knowledge and accurately place each user in the correct learning tier.

Specialized Exam Prep

Dedicated pathways for Italian state requirements: CPIA A2, CILS B1 Standard, and CILS B1 Cittadinanza.

Scalable Business Model

Tiered Micro-Courses

Users purchase affordable, focused mini-courses tailored to their CEFR level — A1, A2, B1, or B2 — paying only for what they need.

Secure Payments

Integration with Stripe and PayPal ensures seamless, encrypted course enrollment for users worldwide.

Future Expansion

Official platform certifications upon course completion and live-tutoring integrations are planned for the next phase.

Modern E-Learning Architecture

ITSI Web Academy is built on a robust, scalable technology stack designed for performance, security, and growth.

Frontend Interface

React.js / Next.js — lightning-fast, SEO-friendly, and fully responsive across all devices.

Backend & Database

Node.js with MongoDB or Firebase — securely managing user profiles, course progress, and quiz scores.

Payment Processing

Stripe API integration for secure, encrypted e-commerce transactions at every enrollment.

Media Hosting

AWS S3 cloud integration for fast, buffer-free streaming of audio and video lesson materials.

Building the Future of Language Learning

ITSI Web Academy is more than a platform — it's a bridge between Sinhala-speaking learners and the Italian language, built with purpose, precision, and a clear vision for growth.

Focused

Distraction-free, structured learning

Accessible

Italian explained entirely in Sinhala

Scalable

Modular courses, secure payments, certifications

Modern

Built on cutting-edge web technology
